Crane Services - Going the extra mile to keep your site safe

## *'Going the extra mile to keep your site safe'*

Since 2000, there have been eight people killed in Tower Crane accidents in the UK. Balfour Beatty Plant & Fleet Services can assure you that safety is their prime consideration. In our mission to be your supplier of choice, the operation of our Tower Crane Fleet includes the following safety assurance benefits:

- We have a modern fleet of cranes, average age 4 years (compared with the industry average of over 10 years)
- Our full repair and maintenance service includes a 60 day service intervention going beyond the industry standard (90 days)
- We have developed a comprehensive Safe Tower Crane Operations Manual which the HSE have reviewed and hailed as industry best practice
- We mandate anti collision measures (including SMIE) on all multi crane sites where cranes oversail public and/or third party areas
- We employ effective anti intruder vandalism precautions
- We carry out Non Destructive Testing (NDT) of the main structural elements of any crane over 10 years of age
- We have full emergency rescue procedures in place with bespoke specialist equipment deployed on every crane with all related personnel trained in its use
- We employ a comprehensive regime to ensure the competence and training of our teams
- Our cranes are branded Balfour Beatty blue and white to match your site's corporate image
- We offer planning, risk assessment and consultancy services for any non Balfour Beatty cranes in use throughout the Group
