Complete servicing and calibration service

We offer a comprehensive range of survey, safety and radio equipment for hire, adopting the most modern units available, provided to the Construction, Utility and Rail industry.

Our survey fleet includes:

- basic engineers levels
- digital theodolites
- rotating lasers
- pipe lasers, digital levels
- total stations, robotic total stations
- GPS

The range of safety equipment provided includes:

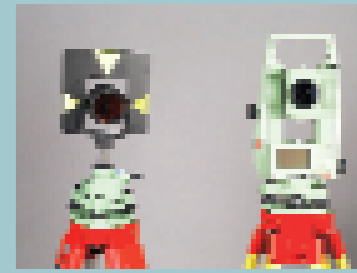

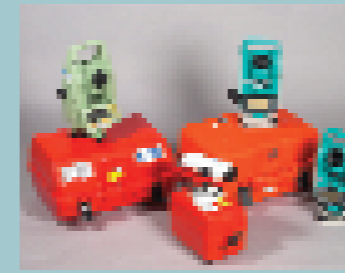

- gas monitors
- escape tripods and winches
- harnesses
- emergency escape sets
- cable detectors
- sound meters

We provide a complete servicing and calibration service, combined with full technical support.

From our telephone ordering hotline,

01698 503555

we offer a reliable next day delivery service throughout the UK.

Radio communications vary from simple 2 way radios, to complex multiple user project installations.

In recognising that safety is paramount, we ensure that all our equipment is fully checked and tested prior to delivery.
